

**Are your containers
safe and compliant?**

Providing a global view on container inspection and certification

Millions of containers around the globe carry the LRQA Container Certification Scheme approval mark, which shows they meet the correct standards and regulations. **Know more. Risk less.**

We offer a full range of services to the container industry. We can certify your new containers and also provide in-service periodic inspection. When your containers need modifications, we can certify those too.

Our market-leading services in design appraisal, inspection, and certification were developed for a wide range of container types.

Container inspection and certification services

- Design appraisal services
- New construction certification
- Owner acceptance inspection programs
- Competent Manufacturer Certification services

We can certify your containers, no matter what type

LRQA has experience assessing high-value, safety critical assets, so we understand what it takes to keep containers safe and in compliance with global regulations. Regardless of the type, LRQA delivers complete container solutions. From design to manufacturing, and inspection to certification, we keep containers moving, no matter where they're going or what they're carrying.

ISO containers

- Shipping containers
- Swap bodies
- Reefers
- Bulk containers
- Flat racks
- Platform based containers

Regulations

Convention for Safe Containers (CSC) as set out by the International Maritime Organization (IMO)

Standards

- ISO 1496 (5 parts)
- EN 1432
- EN 283
- EN 284
- AS 3711

Offshore containers

- Offshore baskets
- Waste skips
- Service containers
- Portable offshore units
- Sling sets
- Offshore portable tanks

Regulations

IMO MSC/Circ. 860

- *Guidelines for the approval of offshore containers handled in open seas, as adopted by SOLAS*

Standards

- EN 12079
- API 2CCU
- DNV 2.7-1
- ISO 10855 when published

Tank containers

- Road and rail tanks
- Swaps and swap tanks
- Offshore tanks
- Modified and refurbished tank containers

Regulations

- ADR – for transportation by road
- RID – for transportation by rail
- IMDG – for transportation by sea
- USDOT (49 CFR) – for transport by road and rail in the US

Standards

- EN283/4 – swap tank container framework
- CSS and ISO 1496 – tank container framework
- Pressure vessel design codes (EU Pressure Equipment Directive, ASME)
- TC Impact Approved – testing for use on Canadian railroads
- UIC – registration for use on European railways

The LRQA Container Certification Scheme: A global mark of quality

The LRQA Container Certification Scheme (LRQACCS) has evolved to become the benchmark for technical container inspection procedures.

The goal of the container scheme is to present container design, inspection, and certification requirements in a clear and concise set of rules for both LRQA and its clients.

It covers the three main types of intermodal equipment for both new construction and in-service inspection:

- CSC/ISO/Intermodal Containers
- Offshore containers and equipment
- Tanks for the transport of dangerous goods

Through the container scheme, we provide assurance that equipment inspected according to its procedures and rules is safe and certified correctly.

Competent Manufacturer Certification

The Competent Manufacturer Scheme is an audit of the proficiency of the manufacturer to fabricate equipment competently in accordance with the regulatory requirements for shipping containers, offshore containers, tanks for the transport of dangerous goods, or ancillary items.

Companies certified to the Competent Manufacturer Scheme want to:

- Prove to their customers they can competently manufacture equipment to the specified standards and regulations
- Ensure their products can be used globally
- Improve their flexibility and competitiveness in the marketplace

Container services that go beyond what's required

The LRQA Container Certification Scheme (LRQACCS) has evolved to become the benchmark for technical container inspection procedures.

Owner acceptance inspection program

Sometimes inspection needs to go beyond the standards and regulations. Companies who are sourcing containers from overseas want to make sure their containers will arrive exactly how they're ordered.

Through LRQA's container owner's acceptance inspection program, companies can make sure their containers meet their specifications in areas such as:

- Construction materials
- Paintwork and markings
- Dimensions (random checks)
- General finish, welding, paintwork (including random thickness checks), floors decals, identification plates

Benefits

- Independent assessment of units against client's acceptance criteria
- Inspection programs tailored to suit each client's needs
- Independent third-party inspection arranged where required
- Reporting tailored to client requirements

Container document management system

The LRQA Container Asset Management Database is an effective container management solution for owners and operators.

Based on Microsoft Sharepoint, this platform provides clear metrics on a company's container assets, making it easier to keep their containers compliant and their jobs on schedule.

System features

- Real-time visibility to inspection statuses as well as completed and upcoming jobs
- Global asset visibility
- Controlled, user-level access
- Storage and file sharing of documentation like design appraisals and inspection certs
- Automatic notifications for upcoming and overdue inspections

Our system brings clarity, efficiency, and organization to the complex world of container management.

Key benefits to certifying your containers through LRQA

Local design appraisals

Our design appraisal team spans the globe. It is comprised of local experts situated in key offices around the world who provide quality design appraisal services and quick turnaround.

Global reach

We offer local services around the globe and a consistent approach to inspection. Our surveyors have extensive experience with all the major offshore container manufacturers in Asia and around the world.

Full asset life-cycle services

Design review and approval
Inspection and certification
Container type approval
Registration
Owner acceptance
In-service inspection and certification

Added-value services

Document management
Inspector training (CSC)
Web-based certification access

One provider is all you need

Why choose LRQA?

We're here to help negotiate a rapidly changing world, by working with you to manage and mitigate the risks you face. From compliance to data-driven supply chain transformation, it's our job to help you shape the future, rather than letting it shape you. We do this by delivering:

Strategic vision

Our technical know-how, sector expertise and innovative, forward-thinking approach will help you meet the challenges of today – and become a safer, more secure, and sustainable organization tomorrow.

Technical expertise

Our people are sector experts. They bring with them a clear understanding of your specific challenges, standards and requirements – then deploy deep knowledge of certification, customized assurance, cybersecurity, inspection and training to help you meet them.

Global capability

Operating in more than 120 countries, recognized by over 50 accreditation bodies worldwide, and covering almost every sector, we can help you manage risk, drive improvement and build credibility with stakeholders around the globe.

Effective partnership

Every business is unique. That's why our experts work with you, to fully understand your needs and goals, and work out how we can best support them.

Fresh perspective

We have led the way in shaping our industry and continue to take every opportunity to collaborate with clients and pioneer new ideas, services and innovation.

Millions of containers carry the LRQA mark

Our mark signifies quality and excellence, and is recognized around the globe. It is the capstone of our services, which have been designed to help companies deliver their containers on time and in compliance, regardless of the type or requirement. From ISO to tank - from CSC to offshore - LRQA offers a complete container certification solution.
