

ISO/IEC 27001:2022

Start your transition

Answering your ISO 27001:2022 questions

LRQA

Frequently asked questions

Q

What is ISO 27001:2022?

A

For any organisation – regardless of size or sector - ISO/IEC 27001 provides a strong foundation for a comprehensive information and cyber security strategy. The standard outlines a best practice ISMS framework to mitigate risks and safeguard business-critical data through identification, analysis and actionable controls. On 25 October 2022, the new version of ISO 27001 was published – marking a new era of information security best practice.

Q

What is ISO 27002:2022 and when was it published?

A

ISO/IEC 27002 provides the best practice controls that organisations can implement to improve security and was designed to be used as a reference for selecting and implementing controls for risk treatment in an Information Security Management System (ISMS) based on ISO 27001. In February 2022, ISO 27002 was updated.

Q

When does the ISO 27001:2022 transition period end?

A

Organisations with existing ISO 27001:2013 certification will have until October 2025 to transition to the new standard. After 30 October 2025, certificates to ISO 27001:2013 will expire or be withdrawn.

Q

How and when should I book my transition audit?

A

Transition audits can now be scheduled. If your renewal audit to ISO 27001:2013 is due after 30 April 2024 you will be required to book your initial audit against the revised standard, ISO/IEC 27001:2022. At LRQA, we are here to support you through the transition process and help you understand how the new version of the standard may affect your organisation. If you have any questions, please speak to your auditor or client support team.

Q

What are the major changes in ISO 27001:2013?

A

The major changes in ISO 27001:2022 that organisations need to be aware of are the updates to Annex A controls in alignment with ISO 27002:2022.

Key Changes to Annex A Controls

The major changes include the restructuring of the original 14 control domains into four categories and the total number of controls being reduced from 114 to 93 – due mainly to the merging of 57 controls into 24 controls. 58 controls remain mostly unchanged, with minor contextual updates, and 11 controls are brand new to ISO 27001:2022.

Q

How can I prepare for a successful ISO 27001:2022 transition?

A

- **Training:** Learning about the revisions to ISO 27001 can be seamless and managed at your convenience through our virtual or in-person training courses
- **Gap Analysis:** Given the revisions to the ISO 27001 standard, we encourage clients to undergo a gap analysis audit to assess your existing information security management system against the requirements of the new standard
- **Transition audit:** To book your transition audit, contact your auditor or client support team

About LRQA:

By bringing together unrivalled expertise in certification, brand assurance, cybersecurity, inspection and training, we’ve become a leading global assurance provider.

We’re proud of our heritage, but it’s who we are today that really matters, because that’s what shapes how we partner with our clients tomorrow. By combining strong values, decades of experience in risk management and mitigation, and a keen focus on the future, we’re here to support our clients as they build safer, more secure, more sustainable businesses.

From independent auditing, certification and training; to technical advisory services; to real-time assurance technology; to data-driven supply chain transformation, our innovative end-to-end solutions help our clients negotiate a rapidly changing risk landscape – making sure they’re shaping their own future, rather than letting it shape them.
