

A commitment to aerospace quality with AS 9100 Series certification.

AS 9100 Series

The aerospace industry - which spans aviation, space and defence - is arguably the most highly regulated sector in the world and businesses are facing new challenges every day.

In order to satisfy regulators and customers alike, certification from LRQA to the AS 9100 Series delivers market access, compliance, reliability and a transparent commitment to global supply chain safety and quality excellence.

What is the AS 9100 Series?

The AS 9100 Series represents the single common quality management system (QMS) for the global aerospace industry. The series comprises of three standards, namely AS 9100 (aerospace organisations), AS 9110 (aviation maintenance) and AS 9120 (aerospace distributors) and it was established by the global International Aerospace

Quality Group (IAQG). The standards are based on the international QMS standard ISO 9001:2015 and incorporate additions and interpretations specific to the aerospace industries. AS 9100 Series has been designed to ensure the

ongoing safety, reliability and regulatory compliance for aerospace products worldwide.

Benefits of AS 9100 Series

Compliance and commitment to excellence

AS 9100 Series certification demonstrates your commitment to quality excellence, continual improvement, risk mitigation and defect prevention. Most importantly, AS 9100 certification delivers regulatory and customer compliance.

Certification is provided in accordance with the IAQG certification scheme, AS 9104, which applies only to aerospace products. Assessments are conducted by specialist assessors who have been authenticated by the aerospace industry and registered on the IAQG Online Aerospace Supplier Information System (OASIS) database.

The assessment uses process based methods defined in AS 9101 and is reported using process effectiveness reports. Report summaries are entered onto the IAQG OASIS system.

Market access and new business opportunities

Once certification is awarded, your details are uploaded to OASIS – the worldwide IAQG database. Used by OEMs to ensure supplier compliance with AS 9100D, your inclusion delivers market access and new business opportunities.

Brand reputation and competitive advantage

AS 9100 Series certification can help to deliver customer confidence thereby improves your brand reputation and competitive advantage.

Act sustainably whilst mitigating risks and costs

The risk-based thinking approach ensures resources are applied effectively which demonstrates your organisational commitment to sustainability whilst helping to mitigate overall risk and reduce associated costs.

Also, the Series shares common elements with ISO 9001:2015, which makes it is easy to integrate with other standards.

How we can help

The aerospace industry is changing now at a faster rate than ever before and as a result your business might face new challenges every day.

That's why we go beyond compliance, diving deeper into your business to emerge with meaningful insights and smarter solutions.

Our assessors and trainers are industry experts who work with you to understand what helps your business operate at its optimum level. They create long-lasting value through collaboration, delivering a greater impact on your business, your people and your customers.

The organisations we work with tell us that this is what makes us stand out from our competitors.

Our services

Gap analysis

We assess your existing quality management system against AS 9100 requirements. We test your readiness for assessment by identifying any critical, high-risk or vulnerable areas to define the right certification plan for your organisation.

Certification and assessment

Our trained and qualified assessors have been authenticated by the aerospace industry and registered on the IAQG OASIS database. Assessments are conducted in accordance with AS 9104-001, the global IAQG certification scheme, which applies to aerospace products and services.

Training

Introduction to AS 9100D Series

This course is designed to give you a detailed understanding of the purpose and objectives of the IAQG, the format, scope, structure and the approaches which underpin them.

AS 9100D Series internal auditor

This course details the role and responsibilities of an Internal QMS Auditor, covering topics such as audit Planning, gathering objective evidence and evaluation of findings.

Why choose LRQA?

We're here to help negotiate a rapidly changing world, by working with you to manage and mitigate the risks you face. From compliance to data-driven supply chain transformation, it's our job to help you shape the future, rather than letting it shape you. We do this by delivering:

Strategic vision

Our technical know-how, sector expertise and innovative, forward-thinking approach will help you meet the challenges of today – and become a safer, more secure, and sustainable organisation tomorrow.

Technical expertise

Our people are sector experts. They bring with them a clear understanding of your specific challenges, standards and requirements – then deploy deep knowledge of certification, brand assurance, food safety, cybersecurity, inspection and training to help you meet them.

Global capability

Operating in more than 120 countries, recognised by over 30 accreditation bodies worldwide, and covering almost every sector, we can help you manage risk, drive improvement and build credibility with stakeholders around the globe.

Effective partnership

Every business is unique. That's why our experts work with you, to fully understand your needs and goals, and work out how we can best support them.

Fresh perspective

We have led the way in shaping our industry and continue to take every opportunity to collaborate with clients and pioneer new ideas, services and innovation.
