

Why HACCP?

HACCP (Hazard Analysis and Critical Control Points) is the internationally recognised risk-based structured operating method that helps organisations in the food and beverage industry to identify food safety risks, prevent food safety hazards and address legal compliance.

Regulatory requirement

Mandatory in many countries – including the US and within the EU – HACCP has been designed for the food sector by the Codex Alimentarius Commission, jointly established by the Food and Agriculture Organisation (FAO) and the World Health Organisation (WHO).

Applicability

HACCP certification is applicable across the food industry from growing, harvesting, processing, manufacturing, distributing, and merchandising to preparing food for consumption.

Design

HACCP is based on seven principles and includes both a corrective and preventative approach to food safety.

Flexibility

Organisations using HACCP have the flexibility to easily progress to either ISO 22000:2018 or FSSC 22000 as HACCP principles underpin both of these.

Benefits

Whether you're a single site manufacturer with a complex supply chain, a multi-site regional business or a global organisation with premises in many countries, our HACCP gap analysis, certification and training services can help you:

- Protect your brand and reputation
- Demonstrate your commitment to food safety
- Increase the transparency and visibility of your supply chain
- Access new markets where HACCP certification is a prerequisite to trade
- Consolidate the process around multiple audits thereby saving you time and money
- Meet consumer and retailer expectations

- Verify your ethical and sustainable credentials
- Upskill your own workforce to build best in class capability and knowledge from our suite of HACCP training solutions

How to get started

Our team of HACCP experts work in partnership with your quality, compliance and risk professionals to ensure you receive the exact service your business requires both today and tomorrow.

Our business model enables us to adapt alongside you as your business evolves and changes over time. Clients tell us that this, alongside our technical expertise, makes us stand out from our competitors.

1 Research

 Start with understanding the main principles of HACCP

2 Plan

- Begin formalising a plan and process and ensure that your leadership teams are involved from the start
- Identify any training requirements you may have

3 Engage

 Talk to us; as HACCP specialists we can guide you on what you need to do to achieve your goals

Why choose LRQA?

We are a leading global provider of compliance and risk services for over 40,000 food, beverage and hospitality businesses.

We're here to help negotiate a rapidly changing world, by working with you to manage and mitigate the risks you face. From compliance to data-driven supply chain transformation, it's our job to help you shape the future, rather than letting it shape you.

We do this by delivering:

Strategic vision

Our technical know-how, food sector expertise and innovative, forward-thinking approach will help you meet the challenges of today – and become a safer, more secure, and sustainable organisation tomorrow.

Technical expertise

Our people are food sector experts. They bring with them a clear understanding of your specific challenges, standards and requirements – then deploy deep knowledge of certification, customised assurance, cybersecurity, inspection and training to help you meet them.

Global capability

Operating in more than 120 countries, recognised by over 30 accreditation bodies worldwide, and covering almost every sector, we can help you manage risk, drive improvement and build credibility with stakeholders around the globe.

Effective partnership

Every business is unique. That's why our experts work with you, to fully understand your needs and goals, and work out how we can best support them.

Fresh perspective

We have led the way in shaping our industry and continue to take every opportunity to collaborate with clients and pioneer new ideas, services and innovation.
